

ZERO TRUST READINESS ASSESSMENT

A STRATEGIC APPROACH TO OPERATIONALIZE ZERO TRUST

If you're ready to adopt Zero Trust but have more questions than answers, the ON2IT Zero Trust Readiness Assessment was designed for you.

We'll help you understand the core tenets and benefits of Zero Trust, define your Zero Trust strategy, assess your current position and build the right Zero Trust roadmap for your unique environment.

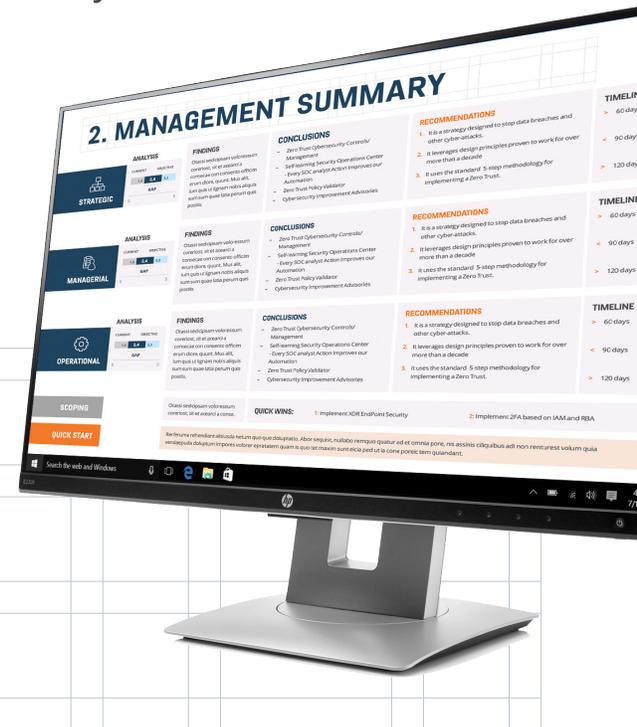

THIS IS YOUR ZERO TRUST JOURNEY

If you are just starting or if your organization has already embarked on the Zero Trust journey, our assessment gives you unparalleled insight in your progress and the next steps to a more mature Zero Trust practice by using our unique Zero Trust Readiness methodology.

Through intensive workshops and discussions with key management representatives and benchmarking your current and desired Zero Trust maturity levels in strategy, management and operations, you will have an objective and well-documented reference document and roadmap to map your progress in preventing cybercrime more effectively.

The Zero Trust strategic approach will raise your security posture, lower risks and impact and help you in getting a higher ROI for your cybersecurity spending. This assessment will help you in speeding up the implementation of your Zero Trust strategy.

TOPIC	CURRENT MATURITY LEVEL	GAP	OBJECTIVE MATURITY LEVEL
Business Risks	1.5	2.5	4.0
Architecture	0.5	3.0	3.5
DAAS Governance	1.0	2.5	3.5

WHAT IS ZERO TRUST?

Zero Trust is a strategic initiative that prevents successful data breaches by eliminating the need for digital trust in your organization. Rooted in the principle of 'never trust, always verify', Zero Trust is designed as a strategy that resonates with the highest levels of any organization yet is tactically deployed using off-the-shelf technology. Zero Trust strategy is decoupled from technology. While technologies improve and change over time, the strategy remains the same.

Zero Trust is the only cybersecurity strategy that prevents successful breaches. Embracing Zero Trust protects your critical assets and ensures you reduce the impact on any attacked area.

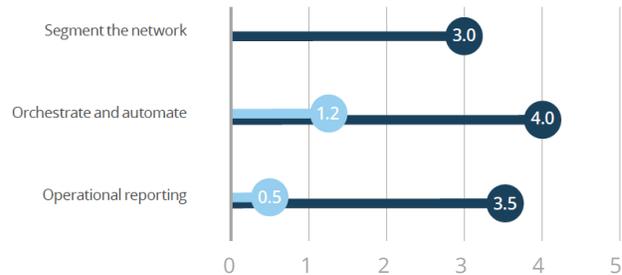

ASSESSMENT OVERVIEW

The ON2IT Zero Trust Readiness Assessment performs a guided assessment based on the three organizational levels of strategic, managerial and operations. The assessment determines the objective for all relevant topics that are required for the successful execution of a Zero trust strategy and rates if the business is ready for the required process, governance or services. Based on the results, organizations can assess their gaps and develop an implementation and improvement plan.

The ON2IT Zero Trust Assessment starts with an assessment questionnaire, followed by an (online) workshop. During this workshop, maturity scores and averages will be calculated using the ON2IT questionnaires at the management level.

The results of the workshop will be summarized by ON2IT in an advisory document, containing the gap analysis and the long- and short-term improvement recommendations to implement the Zero Trust model.

AUXO: THE ZERO TRUST AS A SERVICE PLATFORM

The Readiness Assessment is part of the ON2IT AUXO™ platform. The progress monitor on this platform reports the progress of the implementation during the change as well as during the run phases. It also enables informed decisions about required actions, budgets, and resource allocations.

BENEFITS OF THE ZERO TRUST READINESS ASSESSMENT

- Insight into your digital security within six days;
- Strategic advisory report in PDF including: gap-maturity diagram on Strategic, Managerial and Operational levels that will help guide future improvements;
- Five protect surfaces defined and visible in the AUXO SOAR platform;
- Clarity as to how your organization can effectively implement and maintain your security policy with Zero Trust;
- Short- and long-term improvement advice for implementing Zero Trust;
- Zero Trust roadmap customized for your organization.
