

ZERO TRUST AS A SERVICE

EASILY EMBRACE THE PROTECTIVE POWER OF ZERO TRUST SECURITY THROUGH ON2IT'S ZERO TRUST-AS-A-SERVICE MANAGED APPROACH.

Zero Trust is a powerful prevention strategy when implemented across the entire enterprise – the network, endpoint and cloud. With our comprehensive approach, Zero Trust becomes a true business enabler. While other Managed Security Services Providers manage products, ON2IT manages your protection.

AUXO™, ON2IT's custom-developed Zero Trust Security Orchestration, Automation and Response Platform, underpins our managed 24/7 Eyes-on-Glass Security Operations Center.

THE CHALLENGE

Industry leaders are deepening their commitment to Zero Trust to reduce asset risk, simplify operations and strengthen execution. But they face challenges operationalizing their Zero Trust Strategy and gaining access to experienced Zero Trust resources and skilled cyber talent.

Addressing these challenges requires a fundamental shift in managed security services. It is time for a new category of cyber defense focused on prevention, based on Zero Trust, consumable and affordable. According to Kindervag, the building blocks of authentic Zero Trust have matured and can now be consumed as a service.

THE SOLUTION

ON2IT, a recognized industry leader in Zero Trust, is introducing the next innovation in cybersecurity services, Zero Trust as a Service (ZTaaS). With the introduction of AUXO™, our redesigned cybersecurity platform, ON2IT now delivers Zero Trust through a tightly integrated and automated managed cybersecurity platform designed to both strengthen and simplify protection of sensitive data and critical assets.

Built on Zero Trust principles – design from the inside out, determine who needs access to what/when, inspect and log all traffic – Auxo integrates world-class Zero Trust expertise, technologies, design and implementation services into our managed security operations centers. For the first time, organizations will document and operationalize their Zero Trust strategy within a single platform.

Authentic Zero Trust

Zero Trust was created by ON2IT Senior Vice President, John Kindervag, who developed the strategy while at Forrester Research. John began working with ON2IT founders Marcel van Eemeren and Lieuwe Jan Koning in 2011, beginning a long collaboration with ON2IT, culminating in John joining the ON2IT team in March 2021.

ON2IT built its business using the original core Zero Trust concepts, known as Authentic Zero Trust™.

It has not strayed from the Zero Trust core principles Kindervag defined in the seminal report 'No More Chewy Centers'.

Unlike many others, ON2IT has not tried to redefine the meaning of Zero Trust based upon a product's limitations.

ZERO TRUST AS A SERVICE YOUR KEY BENEFITS AND FEATURES

Managing prevention

- Zero Trust Cybersecurity Controls/Management
- Self-learning Security Operations Center - Every SOC analyst Action Improves our Automation
- Zero Trust Policy Validator
- Cybersecurity Improvement Advisories
- ROE™ Automated Rules of Engagement
- Countermeasures

Alerting and alarming

- Cybersecurity Monitoring
- Experienced Cybersecurity Analysts
- Reveal AI-based Threat Hunting
- EventFlow2.0 Zero Trust Contextual Enrichment of 100% of Security Events
- Automated Resolution of 99.999% of Security Events
- Incident Response Assistance and Guidance

Compliance and improvement

- Zero Trust Strategy Implementation
- High-Value Asset Registration
- Best Practice Violation Alerts
- Zero Trust Fitness
- Protect Surface Management and Dashboard
- Zero Trust Maturity Dashboard
- Compliance, Incident and Service Reporting

WHY A ZERO TRUST STRATEGY?

1. It is a strategy designed to stop data breaches and other cyber-attacks.
2. It leverages design principles proven to work for over more than a decade.
3. It uses a standard 5-step methodology for implementing a Zero Trust architecture.
4. It provides demonstrable, objective, positive security outcomes for companies who adopt Zero Trust.

THE ONLY MSSP WITH ZERO TRUST AS A SERVICE

Combining the innovative AUXO™ platform with Zero Trust security deployed across policy, architecture, and operations, ON2IT Zero Trust as a Service effectively safeguards your networks with proven Zero Trust strategies in a convenient and holistic managed services model.

Zero Trust as a Service includes:

- ➔ A transparent view of all protect surfaces and their DAAS elements, traffic patterns, preventive measures and threats per protect surface.
- ➔ Active management of all controls per protect surface.
- ➔ Zero Trust Fitness: a real-time view of the state of your cybersecurity.

ON2IT AND JOHN KINDERVAG: TRUE CYBERSECURITY INNOVATORS

ON2IT is a global pure-play cybersecurity service provider. ON2IT combines its innovative Zero Trust Security Automation & Orchestration mSOC™ Platform with a team of security analysts who respond in real-time to disruptive security events.

John Kindervag: "ON2IT has implemented more Zero Trust architectures and networks at customer sites than any cybersecurity company worldwide, and they have integrated Zero Trust in all aspects of their products and services."

We are on to it, and you?
